Special Neuroimmunology Symposium

“Inflammation-induced axonopathy: Insights into the neurodegenerative aspects of Multiple Sclerosis”

Thursday, November 7, 2013
3:00 PM - 4:00 PM

Thomas Lane, PhD
Professor of Pathology
University of Utah
“Neural Stem Cells and Repair in a Viral Model of CNS Disease”

Friday, November 8, 2013
8:30 AM - 1:00 PM

Katerina Akassoglou, PhD
Professor, UCSF
Senior Investigator, Gladstone Institutes
“Neurovascular interactions in neuroinflammation: Mechanisms, imaging, and therapeutic potential”

V. Hugh Perry
Professor
Centre for Biological Sciences
University of Southampton
“The impact of systemic inflammation on inflammation in the brain”

Martin Kerschensteiner, MD
Professor of Translational Neuroimmunology
Institute of Clinical Neuroimmunology
Ludwig-Maximilians University Munich
“Cellular, subcellular and molecular imaging of immune-mediated axon damage”

David Pleasure, MD
Professor
Neurology and Pediatrics
UC Davis
“Mechanisms of axonal loss in the multiple sclerosis model EAE”

Biomedical Science Research Building (BSRB)
109 Zina Pitcher Place
Ann Arbor, Michigan
Seminar Rooms A, B, C
