A World Beneath the Huron River

Guided by the C.S. Mott Children’s Hospital theme of “Local Nature and Hope, Aquamoon has created an experience for the Perioperative Floor that encourages discovery, diversion and healing. The overarching motif is a still water section of the Huron River surrounded by the most beautiful lily pads, fish and other aquatic creatures. But this is no ordinary world! Local cultural and civic icons of Ann Arbor are part of this underwater fantasy. Each icon connects the patients, as well as staff, to the local community. A small bond between caregiver and patient emerges and they, together, interact with and in this amazing environment.

Coming soon to the Perioperative Areas!
