

UNIVERSITY OF MICHIGAN MEDICAL SCHOOL
Department of Anesthesiology
Office of Student Education, 936-4277

**Guidelines for Senior Year for Students Interested in
Pursuing a Career in Anesthesiology**

Subinternship:

We have a SubI rotation on CVICU run mainly by anesthesiology which would be an excellent choice. Internal Medicine is also recommended. You should include the ICU requirement as part of your SubI

We would suggest that the student have taken rotations in Internal Medicine, Surgery and Pediatrics.

Electives:

It is recommended that you take an Anesthesiology elective.

Currently we are offering Anesthesiology electives in:

Clinical Anesthesiology

Advanced Anesthesiology – a second rotation which can involve a concentrated experience in any particular area of interest

Chronic/Acute Pain Management

Pediatric Anesthesia

Preoperative and Perioperative Assessment of the Surgical Patient

Anesthesia Research

It is also advisable to consider a number of electives that provide unique experiences not available during residency such as: Radiology, Neurology, Pulmonology and Cardiology.

Any electives in medicine or any experience that allows you to make independent decisions, gives exposure to clinical material, and offers excellent teaching cannot fail to help you in your Anesthesiology residency.
