Green Nails and Other Acts of Rebellion, Life After Loss

Soloway, E. (2014)

She Writes Press

Early in 2009, after more than a decade of marriage, Elaine Soloway's husband, Tommy, began to change. Ultimately, Tommy's doctors discovered that he had frontotemporal degeneration—a diagnosis that explained Tommy's baffling symptoms and transformed Soloway from irritated wife to unflappable, devoted caregiver in one fell swoop. In *Green Nails and Other Acts of Rebellion* Soloway documents Tommy's disease progression, shedding light on the day-to-day realities of those who assume the caregiver role in a relationship with uncompromising honesty and wry humor.
