

Dulcolax is a medication you can use for relief of constipation. The active ingredient in Dulcolax is Bisacodyl, this is a stimulant laxative; it speeds up stool movement by stimulating the bowel muscles. There are different forms of this medication; tablets and suppositories (A **suppository** is a medication delivery system that you put into the rectum (**rectal suppository**)). Which type you need will be decided between you and your doctor.

## Dulcolax Laxative Tablets

Dulcolax Laxative Tablets are tablets that help regulate irregularity and relieve constipation. It produces a bowel movement 6-12 hours after taken, and if taken regularly it can help provide regular bowel movements. The active ingredient is Bisacodyl USP, 5 mg. You take one to three tablets daily with a glass of water. They are approximately \$4.99 for 10 tablets, \$9.79 for 25 tablets, \$16.99 for 50 tablets, and \$23.00 for 100 tablets.
