INHALE is a collaborative quality initiative in partnership with Blue Cross Blue Shield of Michigan that aims to engage and empower Physician Organizations to improve patient outcomes, address inequities in care, and promote high-value health care for patients with asthma and chronic obstructive pulmonary disease (COPD).

Why Asthma and COPD?

- Michigan has some of the highest prevalence rates of asthma (11.2%) and COPD (8.9%) in the U.S. and continues to have significant disparities in the burden of disease.
- The economic burden of asthma in MI is estimated at approximately $3 billion per year, driven by emergency department visits, hospitalizations, readmissions, and loss of productivity.

Patient Impact

Combined, asthma and COPD affect 1 in 5 Michiganders

COPD is the 3rd leading cause of death by disease in the U.S.

"My asthma affects every part of my daily life. From where I can go...to what I can and can't do physically."

What Will We Focus On?

-Spirometry
  Improving appropriate utilization of spirometry for the diagnosis & management

- Medication Over Reliance
  Reducing reliance on short-acting beta-agonists (SABAs) and exposure to oral corticosteroid (OCS)

- Patient Education
  Developing tools to improve clinician & patient understanding of disease control
How Will We Partner with Physician Organizations (POs)?

INHALE seeks to connect key stakeholders across the state to increase knowledge of evidence-based guidelines, bridge information gaps, and support the implementation of quality improvement initiatives.

In our pilot year, we will partner with 10 POs to shape our priorities and provide crucial feedback on INHALE training programs.

POs, practices, and physicians will receive financial incentives if they meet metrics for improvement.

POs may participate iteratively with minimal time investment.

Meet the INHALE Leadership Team!

The INHALE team has rich expertise in pediatric and adult asthma, COPD, allergy, quality improvement, and data analytics.
